

# Operators of the Triax2000, Triax2010 or Triax 2015 meeting the training requirements of ASTM F1292

The following is a list of persons who have completed the training provided by Canadian Playground Advisory Inc., and Playground Clearing House, USA, Inc. under section 7 of ASTM F1292. This is a voluntary list of persons who have agreed to perform inspections to ASTM F1292 and appear on this website. Other persons may offer services for testing to ASTM F1292 and they should be able to provide you with a copy of a certificate of training and certificate number that can be verified by contacting Canadian Playground Advisory Inc. The person performing the test must also be able to demonstrate they have a Triax2000, Triax2010 or Triax 2015 within **current calibration** and the **ASTM F1292 test procedure** is being followed. The person performing the testing may be using their own test report format or the **template** we are providing to ensure consistency.

This list will be updated quarterly.
